2014 GRAND CHEROKEE BUYER'S GUIDE

A close-up, black and white photograph of the front of a Jeep vehicle. The image focuses on the iconic seven-slot grille, which is partially visible on the left. To the right of the grille is a rectangular headlight assembly. Above the grille, the word "Jeep" is written in its signature script font. The lighting is dramatic, highlighting the metallic textures and contours of the car's body.

Variable Valve Timing (VVT) — VVT offers increased engine breathing throughout the rpm range by varying the degree that the valves open and close in conjunction with the piston position. Results are tangible: better performance, more efficient operation, and increased torque for towing and hauling (3.6L, 5.7L and 6.4L).

Fuel Saver Technology — Deactivates four cylinders (1, 4, 6, and 7) during steady-speed cruising, low acceleration, and shallow-grade climbing conditions (5.7L and 6.4L).

Transmission — Driver-interactive manual control via steering-wheel paddle shifters and electronically-modulated torque converter clutch.

Fuel System — Common-rail, Solenoid Injectors (3.0L). Sequential multipoint, electronic fuel injection (3.6L, 5.7L and 6.4L).

BODY/SUSPENSION

Body Design

UniFrame construction: All-steel body sheet metal and frame structural members welded and bonded into a single unit.

Suspension

Front: Short /long arm (SLA), coil springs, gas-charged, twin-tube coil-over shock absorbers, upper and lower control arms ("A" arms), and stabiliser bar. SRT features Bilstein Active Dampening Suspension (ADS)

Rear: Multi-link rear suspension, coil springs, twin-tube shocks (including load-leveling for towing), aluminum lower control arm, independent upper links (tension and camber) plus a separate toelink. SRT features Bilstein Active Dampening Suspension (ADS)

(1) No system, no matter how sophisticated, can repeal the laws of physics or overcome careless driving actions. Performance is limited by available traction control, which snow, ice and other conditions can affect. When the ESC warning lamp flashes, the driver needs to use less throttle and adapt speed and driving behaviour to prevailing road conditions. Always drive carefully, consistent with conditions. Always wear your seat belt. (2) Always check entire surroundings before reversing. (3) Always sit properly in the seat with the seat belt fastened. Children 12 and under should always be in the backseat correctly using an infant or child restraint system or the seat belt positioned correctly for the child's age and weight. (4) Never program while driving. GPS mapping may not be detailed in all areas or reflect current road regulations. See dealer for details. (5) Must use Bluetooth® compatible phone. (6) ACC is a driver convenience system, not a substitute for driver involvement. The driver must remain aware of traffic conditions and be prepared to use brakes to avoid collision. (7) FCW system is solely an alert system for the front of the vehicle which does not take any actions to change vehicle dynamics to avoid a collision; not a substitute for active driver involvement. The driver must remain aware of traffic conditions and be prepared to use brakes to avoid collisions. (8) Always check visually for vehicles prior to changing lanes or backing up.
