

**Revision II August 2016** 

Dealer Service Instructions for:

# Safety Recall S28 Shift Interlock Solenoid Electrical Connector

**NOTE:** The service procedure has been updated.

# Models

2016 (WK) Jeep<sub>®</sub> Grand Cherokee

NOTE: This recall applies only to the above vehicles built through February 19, 2016 (MDH 021909).

IMPORTANT: Some of the involved vehicles may be in dealer used vehicle inventory. Dealers should complete this recall service on these vehicles before retail delivery. Dealers should also perform this repair on vehicles in for service. Involved vehicles can be determined by using the VIP inquiry.

# Subject

The Brake/Transmission Shift Interlock (BTSI) solenoid on about 2,000 of the above vehicles may have an incorrectly crimped electrical connector wire terminal(s). A loss of BTSI solenoid function could lead to the transmission gear selector becoming locked in the "Park" or "Neutral" position. This condition could cause a crash without warning.

# Repair

The gear selector assembly on all involved vehicles must be replaced.

# **Parts Information**

Part Number Description

CBD0S281AA Gear Selector Assembly

<u>Each dealer</u> to whom vehicles in the recall were assigned will receive enough gear selector assemblies to service about <u>5%</u> of those vehicles.

# **Parts Return**

No parts return required for this campaign.

# **Special Tools**

The following special tools are required to perform this repair:

➤ NPN wiTECH micro pod II

➤ NPN Laptop Computer

➤ NPN wiTECH Software

#### **Service Procedure**

1. Disconnect the negative battery cable at the battery.

**NOTE:** If the PRNDM is disconnected from the gear selector with the battery connected, there is a possibility that Diagnostic Trouble Code (DTC) U114C-00 may be set to an 'Active' or 'Stored' state. After the PRNDM is replaced, and the vehicle CAN-C bus has been inactive for a minimum of 30 seconds, and an ignition cycle is begun by turning the vehicle into ACC or RUN state, the PRNDM may not illuminate

Figure 1 – Gear Selector Boot

and/or operate for a short period of time while the shifter determines if the PRNDM is present and functional. This could take up to two minutes if the software in the PRNDM assembly needs to be updated. After that period of time, the PRNDM will illuminate and function normally if there are no other issues. This is a normal fail-safe function of this component

- 2. Using Trim Stick C-4755 or equivalent, detach the gear selector boot from the gear selector bezel (Figure 1).
- 3. Remove and save the gear selector knob retaining screw (Figure 2).
- 4. Remove and save the gear selector knob and boot from the gear selector stalk (Figure 2).
- 5. Open the storage bin door and storage door on the center console.

Figure 2 – Gear Selector Knob

#### **Service Procedure (Continued)**

6. Using Trim Stick C-4755 or equivalent, detach the gear selector bezel from the center console (Figure 3).

CAUTION: There are wire connectors attached to the Terrain Select switch, cup holders and "PRNDM". Take care not to pull out wires while detaching the selector bezel

7. Disconnect the Terrain Select switch, cup holders and "PRNDM" wire harness electrical connectors by depressing the CPA electrical connector latch from the underside of the gear selector bezel and remove the bezel (Figure 4).

# **Service Procedure (Continued)**

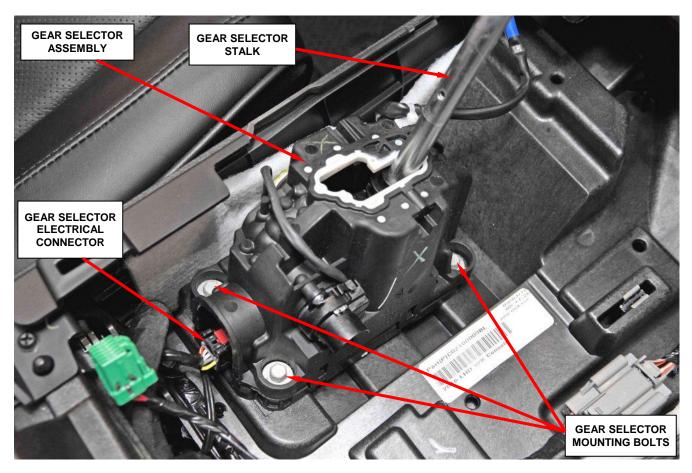

Figure 5 - Gear Selector Mounting Bolts

- 8. Remove and save the four gear selector mounting bolts (Figure 5).
- 9. Disconnect the gear selector electrical connector by depressing and sliding back the red tab on top of the gear selector electrical connector prior to removal of the connector (Figure 5 and 6).
- 10. Carefully remove and discard the original gear selector assembly (Figure 5 and 6).

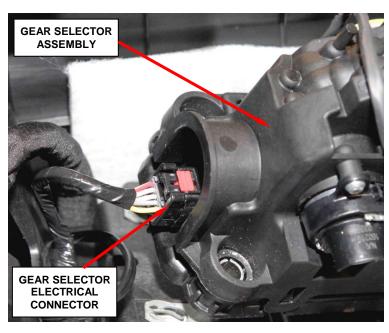

Figure 6 - Gear Selector Electrical Connector

# **Service Procedure (Continued)**

- 11. Connect the gear selector assembly wiring connector by inserting the electrical connector until it is snug and then slide the red tab forward until engagement is felt (Figure 6).
- 12. Position the new gear selector onto the center console and align the 2-way and 4-way pins with the holes in the center console.
- 13. Install the four gear selector mounting bolts and tighten the mounting bolts to 70 in. lbs. (8 N·m) (Figure 5).
- 14. Connect the three wire harness connectors to the back side of the gear selector bezel. Make sure a click is felt during installation to ensure proper retention (Figure 4).
- 15. Install the gear selector bezel onto the console.
- 16. Install the gear selector knob and boot to the gear shift stalk as an assembly (Figure 2).
- 17. Install the gear selector knob retaining screw (Figure 2). Tighten the screw to 18 in. lbs. (2 N·m).
- 18. Snap the gear selector boot to the gear selector bezel.
- 19. Close the storage bin door and center console storage door.
- 20. Connect the negative battery cable.
- 21. Connect the wiTECH scan tool to the vehicle and start a wiTECH session.
- 22. Clear all Diagnostic Trouble Codes (DTC's) from the vehicle.
- 23. Remove the wiTECH scan tool from the vehicle.
- 24. Verify proper operation of the gear selector.
- 25. Return the vehicle to the customer.

# **Completion Reporting and Reimbursement**

Claims for vehicles that have been serviced must be submitted on the DealerCONNECT Claim Entry Screen located on the Service tab. Claims submitted will be used by FCA to record recall service completions and provide dealer payments.

Use the following labor operation number and time allowance:

	Labor Operation	Time
	<u>Number</u>	<b>Allowance</b>
Replace gear selector and		
clear DTC's	08-S2-81-82	0.4 hours

Add the cost of the recall parts package plus applicable dealer allowance to your claim.

NOTE: See the FCA International Warranty Policy and Procedure Manual, Claim Entry Section – Recall Claims for claim processing instructions.

# **Owner Notification and Service Scheduling**

All involved vehicle owners should be notified of the service requirement by their Dealer. Owners are requested to schedule appointments for this service. A sample copy of the owner notification letter is attached.

#### **Vehicle Lists, Global Recall System, VIP and Dealer Follow up**

All involved vehicles have been entered into the Global Recall System (GRS) and Vehicle Information Plus (VIP) for Dealer inquiry as needed.

GRS provides involved Dealers with an <u>updated</u> VIN list of <u>their incomplete</u> vehicles. Completed vehicles are removed from GRS within several days of repair claim submission.

**Dealers** <u>must</u> <u>perform</u> this repair on all unsold vehicles <u>before</u> retail delivery. Dealers should also use the VIN list to follow up with all owners to schedule appointments for this repair.

# **Additional Information**

If you have any questions or need assistance in completing this action, please contact your International Service and Parts Manager.

# IMPORTANT SAFETY RECALL

**S28** 

Dear: (Name)

FCA has decided that a defect, which relates to motor vehicle safety, exists in certain 2016 model year Jeep<sub>®</sub> Grand Cherokee vehicles.

The problem is... The Brake/Transmission Shift Interlock (BTSI) solenoid on your vehicle may have an

incorrectly crimped electrical connector wire terminal(s). A loss of BTSI solenoid function could lead to the transmission gear selector becoming locked in the "Park" or

"Neutral" position. This condition could cause a crash without warning.

What your dealer

will do...

**FCA will repair your vehicle free of charge.** To do this, your dealer will replace the gear selector assembly. The work will take about one hour to complete. However, additional

time may be necessary depending on service schedules.

What you must do to ensure your

safety...

Simply contact your Chrysler, Jeep, Dodge or RAM dealer right away to schedule a service appointment. Ask the dealer to hold the part for your vehicle or to order them before

your appointment. Please bring this letter with you to your dealer.

If you need help... If you have trouble getting your vehicle serviced, please contact the **Dealer** nearest

your location. A representative will assist you in getting your vehicle serviced. This information can be found in the Customer Assistance section of your Owner's

Manual.

We apologize for any inconvenience, but we are sincerely concerned about your safety. Thank you for your attention to this important matter.
